

# Welcome back!

WEEK 2 DAY 4

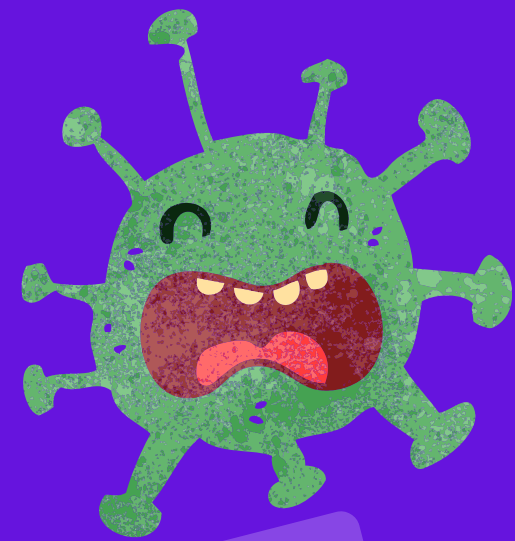

# Today we will be visiting one last system!

CAN YOU GUESS  
WHICH ONE?

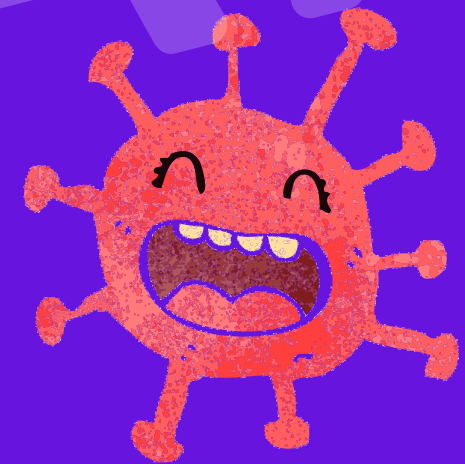

- a) endocrine
- b) skeletal/muscular
- c) immune

CAN YOU GUESS  
WHICH ONE?

DID YOU GUESS....

the immune  
system?

# Let's go over what immunity means!

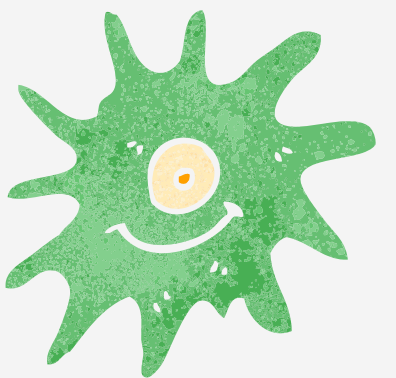

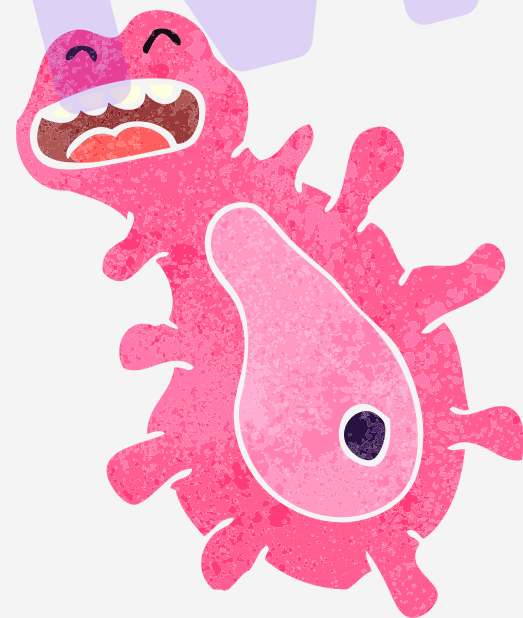

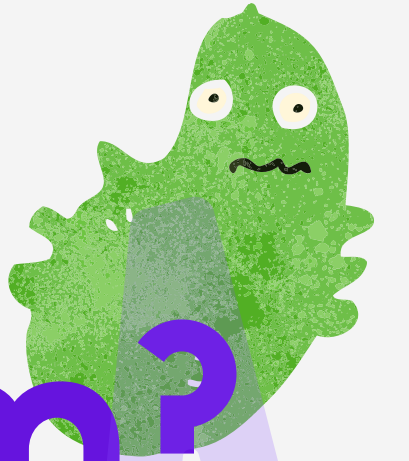

immunity means that you are protected against something!

★immunization (getting your shots)

# what is the immune system?

the immune system helps  
protect us against diseases  
caused by viruses, bacteria,  
and parasites

this castle  
represents the  
human body!

there's some germ  
invaders trying to get  
inside the castle!

the germ army  
includes viruses,  
fungi, parasites,  
and bacteria!

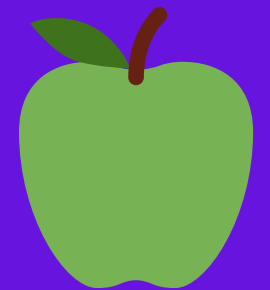

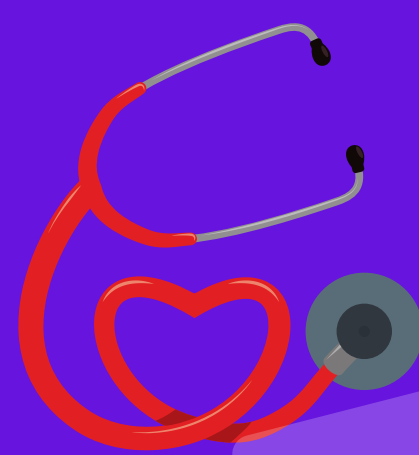

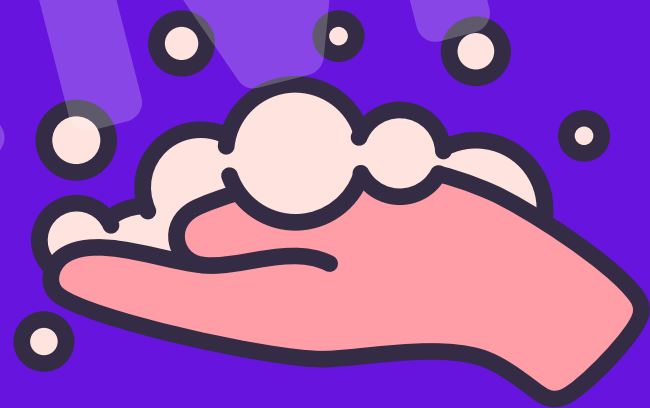

# The king and queen of the castle need **YOUR** help!

Can you help them think of some ways they can  
defend themselves from the germ army?

Hint: think about what you would do to make sure  
you don't get sick!

the king and queen take  
your advice. they try to  
keep the germs out by  
washing their hands,  
getting vaccines, sleeping,  
and eating healthy.

despite their best efforts,  
the germs invaded!

oh no! who will  
protect the  
castle?
